# Emergency Stop Pushbutton Switches equipped with Synchro Safe Contact

## AR22VQR/VQL, VPR, AR30VPR/VPL

### Full Specification of Emergency Stop Pushbutton Switches Equipped with Safety Function

#### ■ Types

- ø22 command switches
- Emergency stop pushbutton switches

Operator	Appearance	Contact arrangement <sup>1</sup>	Type	Button color
Push-lock, turn reset or pull reset  Mushroom head (ø40)		1NC	AR22VQR-01R	Red [R]
		1NO+1NC	AR22VQR-11R	
		2NC	AR22VQR-02R	
		1NO+2NC	AR22VQR-12R	
		1NO+3NC	AR22VQR-13R	
		4NC	AR22VQR-04R	
Push-lock, turn-reset  Giant Mushroom head (ø65)		2NO+4NC	AR22VQR-24R	
		1NC	AR22VPR-01R	
		1NO+1NC	AR22VPR-11R	
		2NC	AR22VPR-02R	
		1NO+2NC	AR22VPR-12R	
		1NO+3NC	AR22VPR-13R	
		4NC	AR22VPR-04R	
		2NO+4NC	AR22VPR-24R	

<sup>1</sup>: Contacts other than those in the table above are also available. 3NC [03], 2NO+1NC [21], 1NO+4NC [14], 2NO+2NC [22], 2NO+3NC [23]

- Emergency stop illuminated pushbutton switches

Operator	Appearance	Operational lamp voltage/ lamp type	Contact arrangement <sup>2</sup>	Type	Button color
Push-lock, turn reset or pull reset  Mushroom head (ø40)		24 V AC/DC LED lamp	1NC	AR22VQL-01E3R	Red [R]
			1NO+1NC	AR22VQL-11E3R	
			2NC	AR22VQL-02E3R	
			1NO+2NC	AR22VQL-12E3R	
			1NO+3NC	AR22VQL-13E3R	
			4NC	AR22VQL-04E3R	
		24 V AC/DC LED lamp Interlocked with lamp circuit	1NO+4NC	AR22VQL-14E3R	
			1NC	AR22VQL-01EAR	
			1NO+1NC	AR22VQL-11EAR	
			2NC	AR22VQL-02EAR	
			1NO+2NC	AR22VQL-12EAR	
			1NO+3NC	AR22VQL-13EAR	
			4NC	AR22VQL-04EAR	
			1NO+4NC	AR22VQL-14EAR	

<sup>2</sup>: Contacts other than those in the table above are also available. 3NC [03]

- ø30 command switches
- Emergency stop pushbutton switches

Operator	Appearance	Contact arrangement <sup>1</sup>	Type	Button color
Push-lock, turn-reset Mushroom head (ø44)		1NC	AR30VPR-01R	Red [R]
		1NO+1NC	AR30VPR-11R	
		2NC	AR30VPR-02R	
		1NO+2NC	AR30VPR-12R	
		1NO+3NC	AR30VPR-13R	
		4NC	AR30VPR-04R	
Support for Padlock		2NO+4NC	AR30VPR-24R	

<sup>1</sup>: Contacts other than those in the table above are also available. 3NC [03], 2NO+1NC [21], 1NO+4NC [14], 2NO+2NC [22], 2NO+3NC [23]

- Emergency stop illuminated pushbutton switches

Operator	Appearance	Operational lamp voltage/ lamp type	Contact arrangement <sup>2</sup>	Type	Button color
Push-lock, turn-reset Mushroom head (ø44)		24 V AC/DC LED lamp	1NC	AR30VPL-01E3R	Red [R]
			1NO+1NC	AR30VPL-11E3R	
			2NC	AR30VPL-02E3R	
			1NO+2NC	AR30VPL-12E3R	
			1NO+3NC	AR30VPL-13E3R	
			4NC	AR30VPL-04E3R	
		24 V AC/DC LED lamp Interlocked with lamp circuit	1NO+4NC	AR30VPL-14E3R	
			1NC	AR30VPL-01EAR	
			1NO+1NC	AR30VPL-11EAR	
			2NC	AR30VPL-02EAR	
			1NO+2NC	AR30VPL-12EAR	
			1NO+3NC	AR30VPL-13EAR	
			4NC	AR30VPL-04EAR	
			1NO+4NC	AR30VPL-14EAR	

<sup>2</sup>: Contacts other than those in the table above are also available. 3NC [03]

● **New safety function: Synchro safety contact**

When the Contact unit is removed from the operator, the NC contact opens and automatically turns off

● **Side indicator is adopted by default (only for AR22V)**

Easily check the green side indicator to ensure the condition of the NC contact

● **Integrated frame (bezel) for the protrusion** There is no need to acquire it separately as an accessory.

● **Enhanced visibility by adopting larger flange on all models.**

The larger yellow flange allows for better visibility of the yellow background with no need of the nameplate. (only for AR22V)

- Safety trigger-action mechanism locks the pushbutton only when the contact is activated. Accidental lock of the pushbutton is prevented. (compliant with EN60947-5-5)
- Direct opening mechanism for NC contacts to ensure that the contacts can be opened even in the unlikely event that they become fused. (compliant with EN-60947-5-1, Appendix K/EN60947-5-5)
- Support by default for the degree of protection of operator: IP65 and the degree of protection of terminal section: IP2X (compliant with EN60204-1).
- The arrows on the button have been standardized to the same color as the button itself in order to prevent erroneous operation.
- Certified with UL/CSA standard and TÜV EN standard, and acquired China Compulsory Certification (CCC). CE mark is attached.

- Certified with UL category code NISD (EMERGENCY STOP DEVICE).

## Enhanced operability

### Enhanced release performance of contact unit

One Touch mounting. The wire is not twisted at the time of attaching and detaching the unit.

### Reduce panel-mounting depth, connectable to up to six contacts.

"2NO+4NC" contacts (an emergency stop) enables you to construct two kinds of mechanical safety circuits (2NC: redundancy).

### Enhanced routing

Since the layout of each contact is fixed regardless of the number of contacts, any miswiring can be prevented.

Terminal arrangement	Contact arrangement	Non-illuminated type	Illuminated type	Illuminated type (interlocked with lamp circuit)
1NC to 4NC				
1NO 1NC to 4NC				
2NO 1NC to 4NC				

Red square means contact terminal "NC"  
Green square means a lamp terminal  
Blue square means contact terminal "NO"

- Pull-reset or turn-reset is available for the reset method (turn-reset only for AR30V type).
- The illumination can be interlocked with the lamp circuit.
- Adapter dedicated for  $\phi 30$  mounting hole (only for AR22V)
- The layout of NC contacts can be arbitrarily designated (only contact specifications for 1NC to 3NC, special model). For details, refer to the terminal arrangement designation on the final page.

## Support for Padlock

- To avoid a restart due to careless reset of a pushbutton switch in case of emergency stop, make use of Padlock or HASP.

The total mass should be 1500 g or less. For information on applicable Padlock and HASP, refer to the final page.

## Specifications (indoor use)

Item		Performance
Rated insulation voltage Ui		250 V AC/DC
Durability	Mechanical	250,000 operations
	Electrical	100,000 operations (AC-12, DC-13, DC-12)
Operating cycles per hour		900 operations/hour (On-load factor: 40%)
Withstand voltage		Between live section and grounding: 2,000V AC, 1 minute
		Between opposite polarity live sections: 2,000V AC, 1 minute
Insulation resistance		Between live section and grounding: 100MΩ or more (500V DC megger)
		Between opposite polarity live sections: 100MΩ or more (500V DC megger)
Rated impulse withstand voltage Uimp		2.5 kV
Conditional short-circuit current		1000 A
Short-circuit protective device		gG10A (IEC60269 fuse)
Pollution degree		3 (panel inside: 2)
Vibration		Malfunction: maximum double amplitude: 0.7 mm (maximum: 50 m/s <sup>2</sup> ), frequency: 10 to 500 Hz
		Durability: maximum double amplitude: 0.7 mm (maximum: 50 m/s <sup>2</sup> ), frequency: 10 to 500 Hz <sup>1)</sup>
Shock		Malfunction: 150 m/s <sup>2</sup>
		Durability: 1000 m/s <sup>2</sup> <sup>2)</sup>
Operational ambient temperature		Non illuminated type: -20 to +60°C, illuminated type: -20 to +50°C (no icing or no condensation)
Storage temperature		-40 to +80°C (no icing or no condensation)
Relative humidity		45 to 85%RH (-5 to +40°C) (no icing or no condensation)
Degree of protection of operator (displaying) section		IP65 (dust-proof, water jet proof): IEC 60529
Degree of protection of terminal section		IP2X (when wired)
Connectable wire		Stranded wire: up to 1.25 mm <sup>2</sup> , 24 to 16 AWG-CU
		Solid wire: up to ø1.2 mm, 24 to 16 AWG-CU

<sup>1)</sup>: The feature is decided based on the test condition for EN60947-5-5 (1998).

<sup>2)</sup>: Except when the switch is mounted upside down.

## Contact ratings

- TÜV (EN60947-5-1), CCC (GB14048.5), and JIS C 8201-5-1

Conventional free air thermal current (rated thermal current) Ith	Rated operational voltage Ue	Rated operational current Ie			
		AC		DC	
		AC-15 (Inductive load)	AC-12 (Resistive load)	DC-13 (Inductive load)	DC-12 (Resistive load)
5 A	24 V	—	—	1.0 A	2.0 A
	120 V	3.0 A	5.0 A	—	—
	125 V	—	—	0.22 A	0.4 A
	240 V	1.5 A	3.0 A	0.1 A	0.2 A

- UL/CSA standards

- AC (cosφ = 0.35)

Contact rating	Conventional free air thermal current (rated thermal current)	120 V		240 V	
		Making current	Breaking current	Making current	Breaking current
B300	5 A	30 A	3 A	15 A	1.5 A

- DC (T<sub>0.95</sub> = 6P, maximum: 300 ms)

Contact rating	Conventional free air thermal current (rated thermal current)	Making current & breaking current	
		125 V	250 V
R300	1 A	0.22 A	0.11 A

- NECA C 4521

Conventional free air thermal current (rated thermal current) Ith	Rated operational voltage Ue	Rated operational current Ie			
		AC		DC	
		AC-15 (Inductive load)	AC-12 (Resistive load)	DC-13 (Inductive load)	DC-12 (Resistive load)
5 A	24 V	—	—	1.0 A	2.0 A
	110 V	3.0 A	5.0 A	0.22 A	0.4 A
	220 V	1.5 A	3.0 A	0.1 A	0.2 A

## Contact reliability

FUJI has confirmed that the product can be used in 1mA circuit conditions at 5V AC or DC.

The operable range, however, may vary depending on the operational ambient conditions and type of load.

## Lamp rating and current consumption

Type of lamp	Luminous color	Operational lamp voltage	Current consumption
LED lamp	Red	24 V AC/DC	7.5 mA AC, 7.5 mA DC

Note: The LED lamp of these products cannot be replaced.

## Dimensions, mm

- AR22VQR

- AR22VPR

- AR22VQL

- AR30VPR / VPL

## ■ Panel cutout [mm]

### • AR22

### • AR30

## ■ Applicable panel thickness

The applicable panel thickness is 1 to 6mm. However, a  $\phi 30$  switch mounted with their adapters should have an applicable panel thickness of 1 to 4.5mm.

If a legend plate is used, the panel should be made thinner by subtracting the thickness of that component.

Note: If a legend plate or similar is used between the switch and

the fitting surface of the panel, the thickness of the legend panel should be 1.6mm or less. If the thickness exceeds the value of 1.6mm, it may prevent the fixing function of the switch.

## ■ Mounting the switch

### ● Removing the operator from the contact unit

① Pull down the release cover of the contact unit, ② turn it counter clock wise in 15 degrees, ③ at the position pull the contact unit, after that, the contact unit can be removed from the operator.

#### • Caution at the removing process of the contact unit from the operator

- (1) When the contact unit is removed from the operator, at the process, "NO" contact of the unit is turned into "ON" position.
- (2) At the process when the contact unit is removed from the operator, don't give excessive force to the unit. It may cause the switch to break or to go into maloperation.

### ● Mounting the operator on the panel

Remove the tightening nut and washer from the packaged state of the operator, checking the packing whether it is placed properly on to the fitting surface of the front side of the panel, insert the operator while keeping the ▼ mark at the top position into the installation hole of the panel. The operator penetrates the panel through the installation hole to the rear side of the panel. It is fixed at the rear side of the panel with the tightening nut turned by the tightening wrench.

Note 1 : The proper tightening torque is 1.0 to 1.5N·m for AR22, and 1.5 to 2.5N·m for AR30.

Note 2 : The tightening nut has two faces, convex and concave. Face the concave side of it to the panel when it tightens up the operator at the rear side of the panel. If it is used in the opposite face, the operator will not be fixed properly there.

Note 3 : Check the tightening nut regularly whether it tightens the operator properly. If it seems that tightening is not sufficient, do not forget to tighten the screw increasingly.

Note 4 : Do not use pliers or other improper tools to tighten the nut, and do not tighten it excessively, or the nut may be damaged or the switch may malfunction.

\*1: The washer does not come with AR30.  
\*2: AHX536 for AR30 type.

### ● Mounting the contact unit

Meet the mark ▲ on the contact unit to the same mark ▼ on the operator, insert the contact unit completely into the operator until it makes a click sound. (The click sound indicates the contact unit is completely connected to the operator.)

After the contact unit is set, check the sequence and test the unit.

### ● Caution when the contact unit is set in

- (1) This release cover must be twisted in order to remove or connect the contact unit to the operator portion. Please note: The position of the release cover will be in a different position (either twisted to the right or left) from when it is connected to the operator.
- (2) The triangle marks on the grooves of the operator and contact unit will need to match up when connecting the two parts. Please note: Not connecting the correct grooves with the correct marks can cause it to break.

## ■ Others

### ● Operation

- Do not hit or flip the button, or the button may be damaged. Be sure to operate the button by hand. Operate the switch manually. Don't use any tools such as a hammer or other tool to hit the switch for operation. It may break the switch.
- To unlock the switch, turn the button approximately 45° clockwise (in the direction of the arrow) or pull out the button. Do not operate or handle the button with excessive force.

### ● Effect of receiving shock for the switch

- Effects of receiving shock is based on the installation of the switch. If the switch is mounted upside down, it may not operate correctly.
- Don't give excess force to the button as it will damage the circuit.

### ● Contact Unit

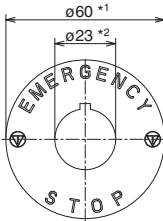

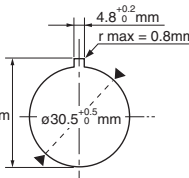

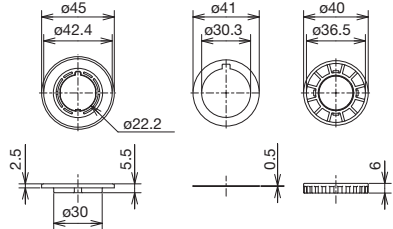

- The contact unit is not dust proof, water proof or oil-tight. Do not allow liquid or cutting chips to pass through inside or the unprotected contact unit.
- Don't give any excessive physical load or shock to the contact unit. It may break the switch or make it in trouble to lose its ON and OFF function.

## Storage and Usage Locations

- Be sure to use and store the product within the rated ambient temperature and humidity ranges.
- Although the product resists ordinary cutting oils and coolant oils, do not use the unit in places where special oils may be sprayed onto the product. If you experience this issue, please contact Fuji Electric.
- If dusts or filings accumulate in the gap between the button and the frame, the switch may fail to operate normally.
- This switch are for indoor use. Don't use the switch for outdoor use and make sure that the product is not exposed to direct sunlight.
- Do not use the product in the places that are subject to the adverse effects of ozone or corrosive gases.

## Control box dedicated for emergency stop pushbutton switch

- Features**
  - Control box for mounting the emergency stop pushbutton switch AR22VQR/VQL, VPR.
  - It is easy to mount or add this box to the desired places away from the operating panel.
  - Degree of protection : IP65 (when using applicable connector)
  - Double-insulation structure without the need for an earth wire. (compliant with IEC536 class II)
  - The knockout holes open at the top, bottom, and back.
  - The emergency stop Legend plate (AR9P722) can be mounted.
- Applicable connector**
  - Knockout holes at the top and bottom: M20, Pg13.5, or G1/2
  - Knockout holes at the back: M14 or G1/4
